

Caring for your Loyal Companion

Through Every Season of Life

At **Kingdom Pet Hospital**, we believe every stage of your pet's life is a gift—and we're here to help you steward that gift with wisdom and love. Dogs age much faster than people. For every year that you age, your dog may age six to eight years. That's why staying ahead of changes in their health is so important.

As your pet grows, their medical and nutritional needs shift. Our Wellness Plans are thoughtfully designed to walk alongside you in each season—supporting early detection of illness, monitoring vital organ function, and tailoring care that fits their age and lifestyle.

Every **Adult Wellness Plan** at Kingdom Pet Hospital includes comprehensive exams, core vaccinations, essential lab tests, and other preventative care services that help protect your pet from illness and disease. For deeper care, our upgraded plans include routine dental cleanings, advanced bloodwork, and imaging like x-rays to catch issues early—before they become serious.

OUR MISSION is to keep your pet healthy, joyful, and thriving through their prime years and beyond—because every life entrusted to us is part of God's creation, and deserves to be honored with excellence and compassion.

Caring for your Loyal Companion

Through Every Season of Life

At **Kingdom Pet Hospital**, we believe every stage of your pet's life is a gift—and we're here to help you steward that gift with wisdom and love. Cats age significantly faster than humans—each year of your life could equal 6 to 8 years in theirs. That means regular veterinary care isn't just helpful, it's essential.

As your cat grows, their medical and nutritional needs shift. A **Kingdom Wellness Plan** is designed to support their changing needs through all seasons of life. It helps us detect health concerns early—before they become more serious—and keeps their vital organs, teeth, and overall body functioning at their best.

Every **Adult Wellness Plan** at Kingdom Pet Hospital includes comprehensive exams, core vaccinations, essential lab tests, and other preventative care services that help protect your pet from illness and disease. For deeper care, our upgraded plans include routine dental cleanings, advanced bloodwork, and imaging like x-rays to catch issues early—before they become serious.

**Faithful care,
proactive protection**
tailored to your
pet's life stage

Each Kingdom Wellness Plan provides essential veterinary care for one full year and can be upgraded as your pet grows. Our plans are designed to support your pet's health journey with compassion, excellence, and affordability.

KINGDOM BEGINNINGS: PUPPY & KITTEN WELLNESS PLAN

Guiding your pet's first year with grace, love, and expert care

From the moment they're born, puppies and kittens receive natural protection from their mother. But by 6 weeks of age, that protection fades — and your little one begins to rely on you for continued health and safety.

At **Kingdom Pet Hospital**, our **Puppy & Kitten Wellness Plans** are thoughtfully designed to carry your pet through this critical first year of life. By combining routine checkups, vaccinations, diagnostics, and surgical care (if needed), we lay the foundation for a longer, healthier, and joy-filled life.

WHY ENROLL?

OUR PLANS INCLUDE:

Comprehensive wellness exams

Core puppy | kitten vaccines

Lab work and early disease screening

Nutritional and behavior guidance

Parasite prevention

Spay/neuter option (with pre-surgical blood work & recovery care)

We recommend enrolling your pet between 6 weeks and 5 months of age for optimal protection and value.
